

PRODUCT DETAILS

KEY FEATURES

- 100% pure coconut shell charcoal
- CO₂ neutral and eco-friendly
- Healthy - No chemicals added and toxic free

BENEFITS

- Eco-friendly: Made of 100% natural ingredients only.
- Longer burning time, hotter and better cooking.
- Burns above +180 C for more than 240 minutes (4 hours).
- Smokesless.
- Easy to light up and clean burning.
- According to EN 1860-2 standard.

BBQ A-240 Briquettes Coconut Shell Charcoal Based

Our high quality coconut BBQ briquettes are made from carbonized coconut shells. The shells that we use are harvested in a sustainable manner, without harming coconut palm trees, animal habitats or the environment. The briquettes are free from impurities and we don't use any chemicals that could give in admissible smoke and bad taste to the food. The briquettes are easy to light up and burn above +180 C for more than 240 minutes (4 hours) based on the FORCE Technology's T180 test method.

Our briquettes are carefully made and our products are subjected to a wide range of tests. Throughout the production processes our QC team performs random tests in all steps from the receipt of raw material to packaging. Our in-house lab performs following tests : ash content, volatile matter, fixed carbon, moisture content, etc. Sucofindo (SGS appointed independent lab) ensures our test results are in line.

SPECIFICATIONS

SPECIFICATIONS	
Carbon	+/-65%
FoodGradeStarch	2%
Moisture	+/-7%
Ash	+/-15%
VolatileMatters	+/- 11%

MEASUREMENTS&WEIGHTS	
Length	60mm
Width	45mm
Height	27mm
Weight	+/-37grams

APPLICATIONMANAGEMENT

For all types of barbequing purposes

PACKAGING

- Standard packages; 3kg, 5kg and 10 kg.
- Customized packaging as per request.
- We can assist with art print on paper bags or carton boxes.
- Packed on slip-sheets, ready to export.
- Finished, stacked pallets are wrapped in plastic to secure the goods under transportation.
